

August 12th 2019 - IMRVT Trail Report

- Construction is well underway on Phase 2. Grading has been completed in Brandywine Nature Preserve, and along 3rd St. I have requested information related to the timing and location of construction meetings. I have also asked a number of questions related to the height of the trail along 3rd St and if it will be separated from traffic adequately, for safety purposes. So far, I have no response as to whether we are on target for October 30 completion, per plan.
- Some trees in BNP should also be removed as a proactive step to minimize root undermining the trail in future growing seasons.
- The condition of the Trail is very good. Many good Samaritans have been cleaning up miscellaneous small items. Thanks to those folks !!
- Need a replacement rail for the split rail fence which runs along Stateline Rd. One is missing.
